AGREEMO

Mobile Application

Main Dashboard

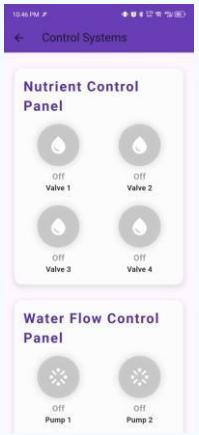

Upon opening the app, the user can interact with different buttons to check, monitor and control the machines inside the greenhouse and its harvests.

The user can scroll down to see the water levels inside the containers in the greenhouse

Control Tab

When the user presses the control button, they can see the different buttons to turn on and off the machine inside the greenhouse

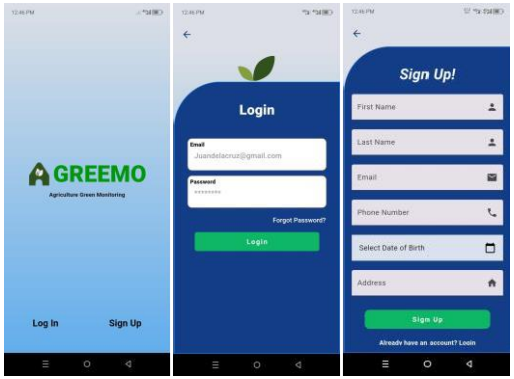

Mobile Application

Installation

- Locate the APK file from your file manager app. Navigate to the folder where you saved the AGREEMO APK file.
- Tap on the AGREEMO APK file to initiate installation.
- Grant permissions that android will likely ask you to grant to install unknown apps.
- Review permissions then tap “Install” if you are comfortable with the permissions.
- The Installation process will begin and wait for it to finish.
- Open AGREEMO once the installation is finished.

Login

The user will need to input their credentials to sign up and login to be able to use the features of the mobile application.

Web Application

Login

This is where the user can input their login credentials.

Reset Password

If the user forgets their password they can click this button below the password field, it will then require the user to input their email to verify their account.

After the user verifies their account, they can change their password by creating a new one and confirming it.

User Manual

Web Application

Main Dashboard

After they login they will be greeted with the AGREEMO dashboard where it contains data and graphs from their greenhouse.

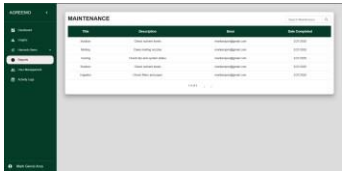

Navigation Bar

The user can use the sidebar to navigate the harvests items tab to see how many harvests have been accepted, rejected, total yield, and lose rate.

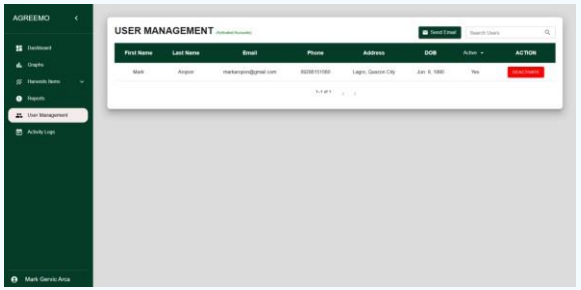

The user can pick which table they want to see from harvested and rejected, the user can also filter when it was harvested.

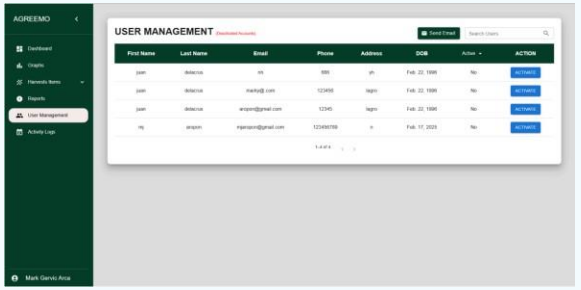

Below harvests items the user will see the reports of the actions a user from the mobile application made in a table.

Web Application

User Management

The user can also manage accounts in the user management tab where

they can deactivate specific accounts and send email.
